

World Happiness Report

Analysis of various factors influencing global happiness

By Wisdom Idiakhwa - 08/01/2025

Correlation Heatmap

- The heatmap displays the correlation between several key attributes: Economy (GDP per Capita), Family, Health (Life Expectancy), Freedom, Trust (Government Corruption), Generosity, and Happiness Score. Each cell in the heatmap represents the correlation coefficient between two attributes, with darker colors indicating stronger correlations. This visualization helps us understand the relationships between different factors and how they collectively impact happiness.

Correlation Heatmap

Scatter Plot: GDP per Capita vs. Happiness Score by Region

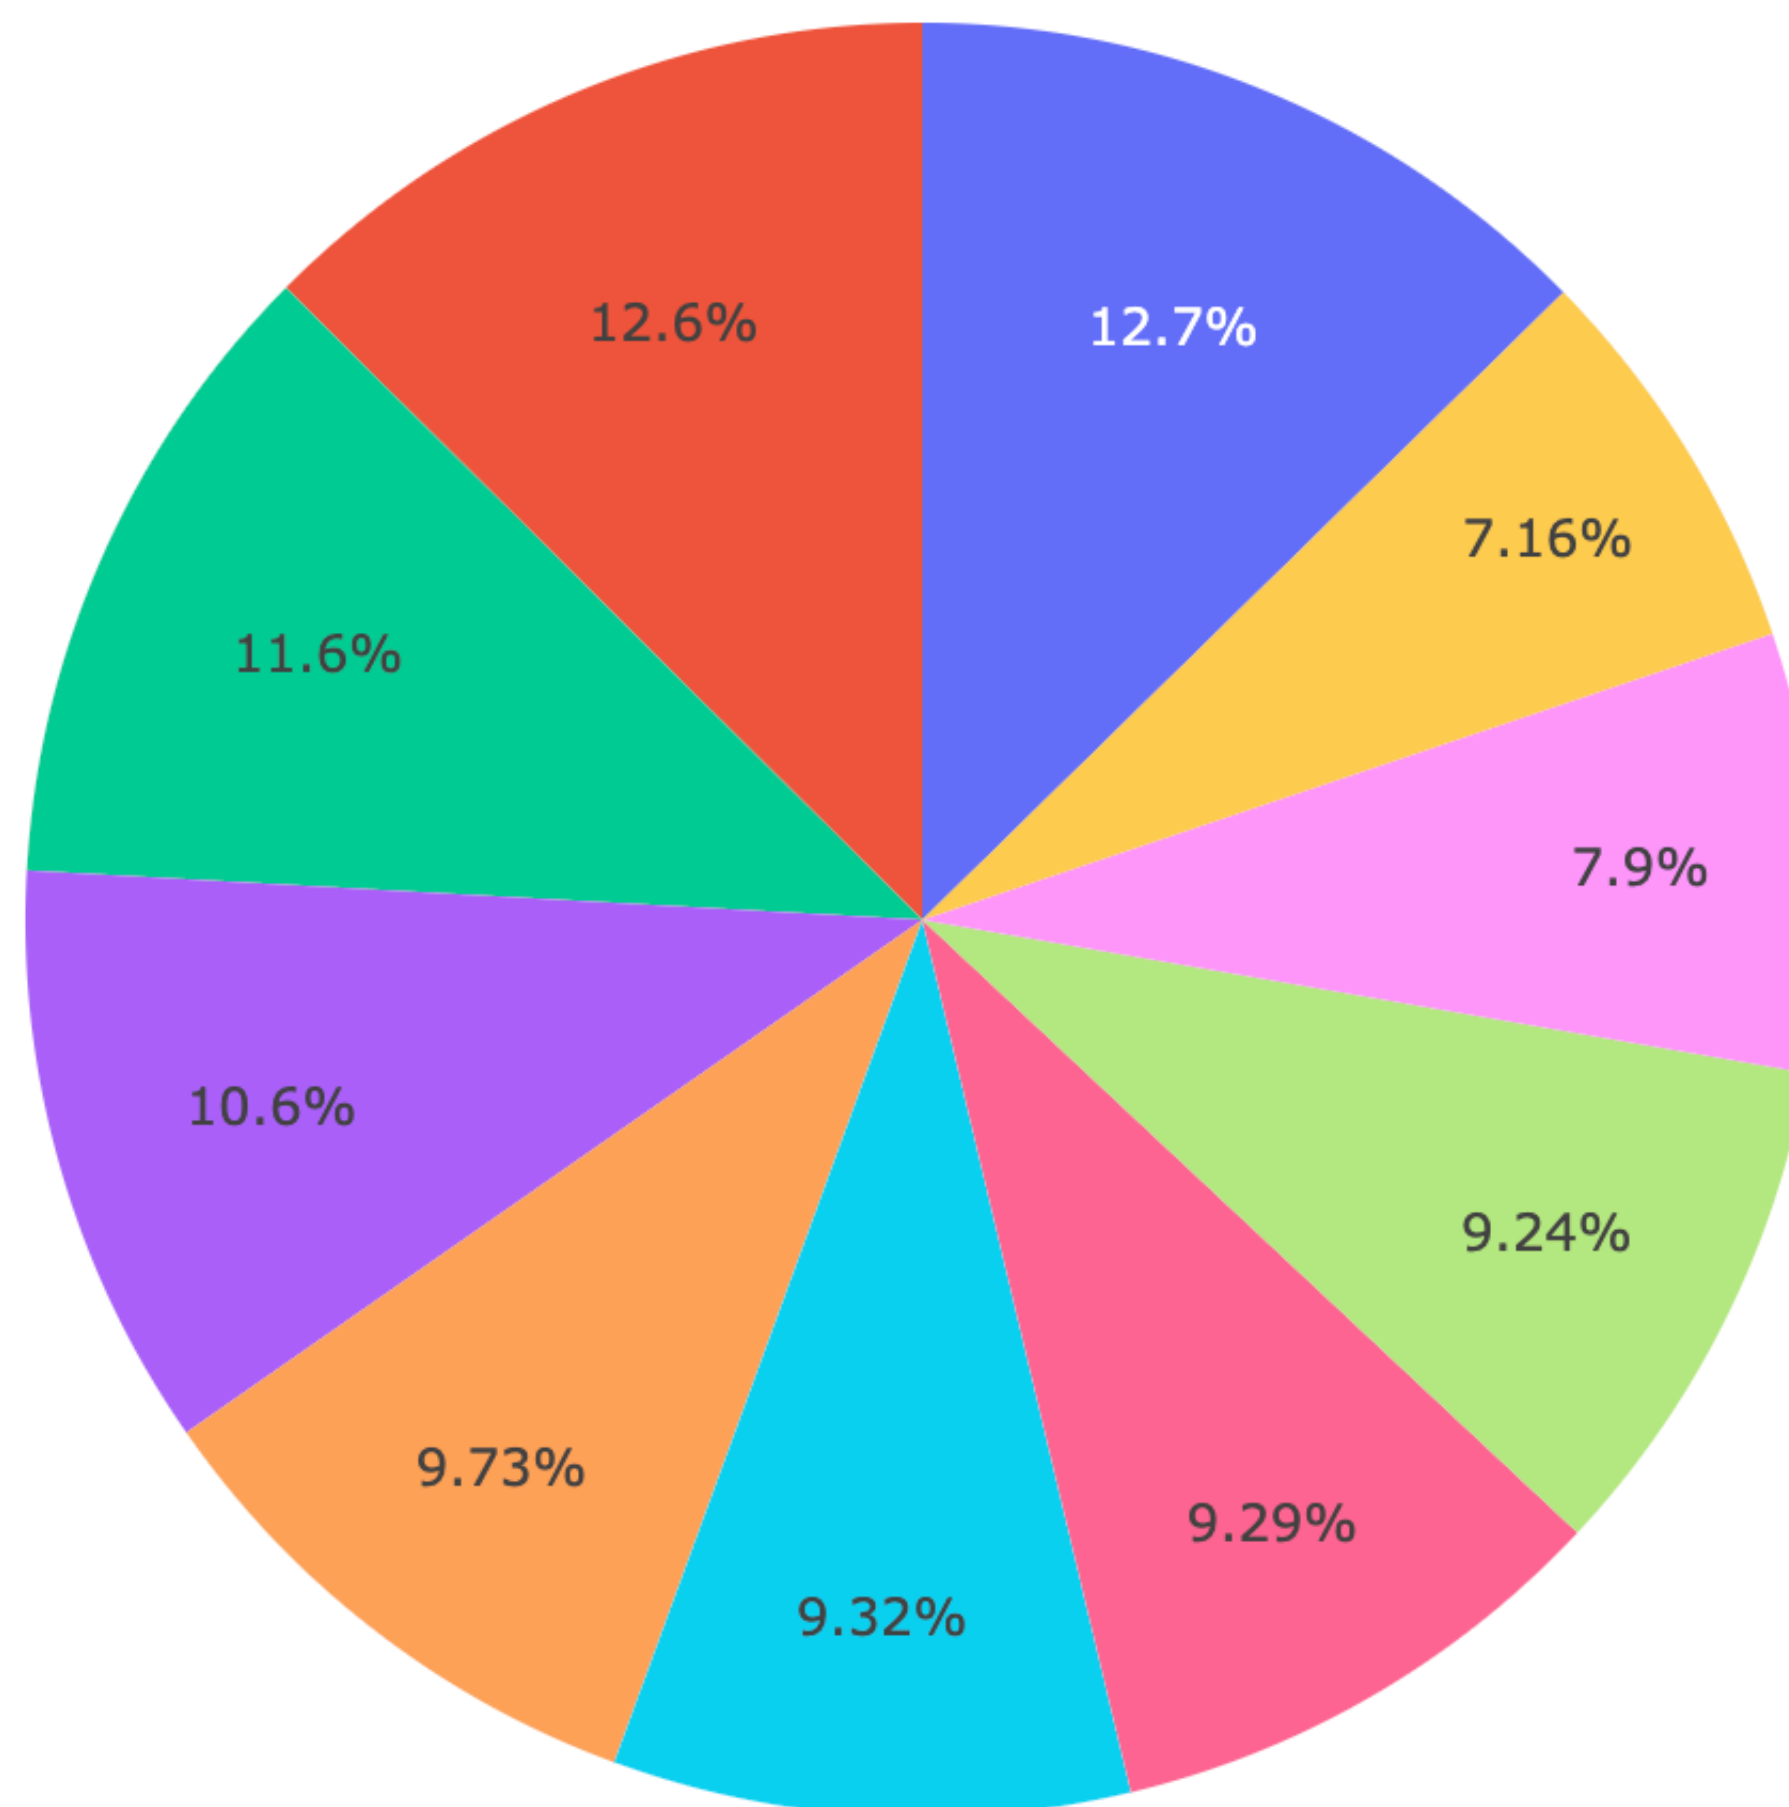

- The scatter plot illustrates the relationship between GDP per Capita and Happiness Score across various regions. Each data point represents a country, colored according to its region. By analyzing this plot, we can identify trends and patterns that suggest how economic prosperity influences the overall happiness of a nation. It also allows us to see regional differences and compare the economic and happiness metrics across different parts of the world.

Pie Chart: Happiness Score by Region

- The pie chart presents the average Happiness Score for each region. This visualization provides a clear comparison of happiness levels across different regions, highlighting which areas of the world report higher or lower happiness scores on average. It serves as a valuable tool for understanding regional variations and identifying areas that might require policy interventions to improve well-being.

Happiness Score by Region

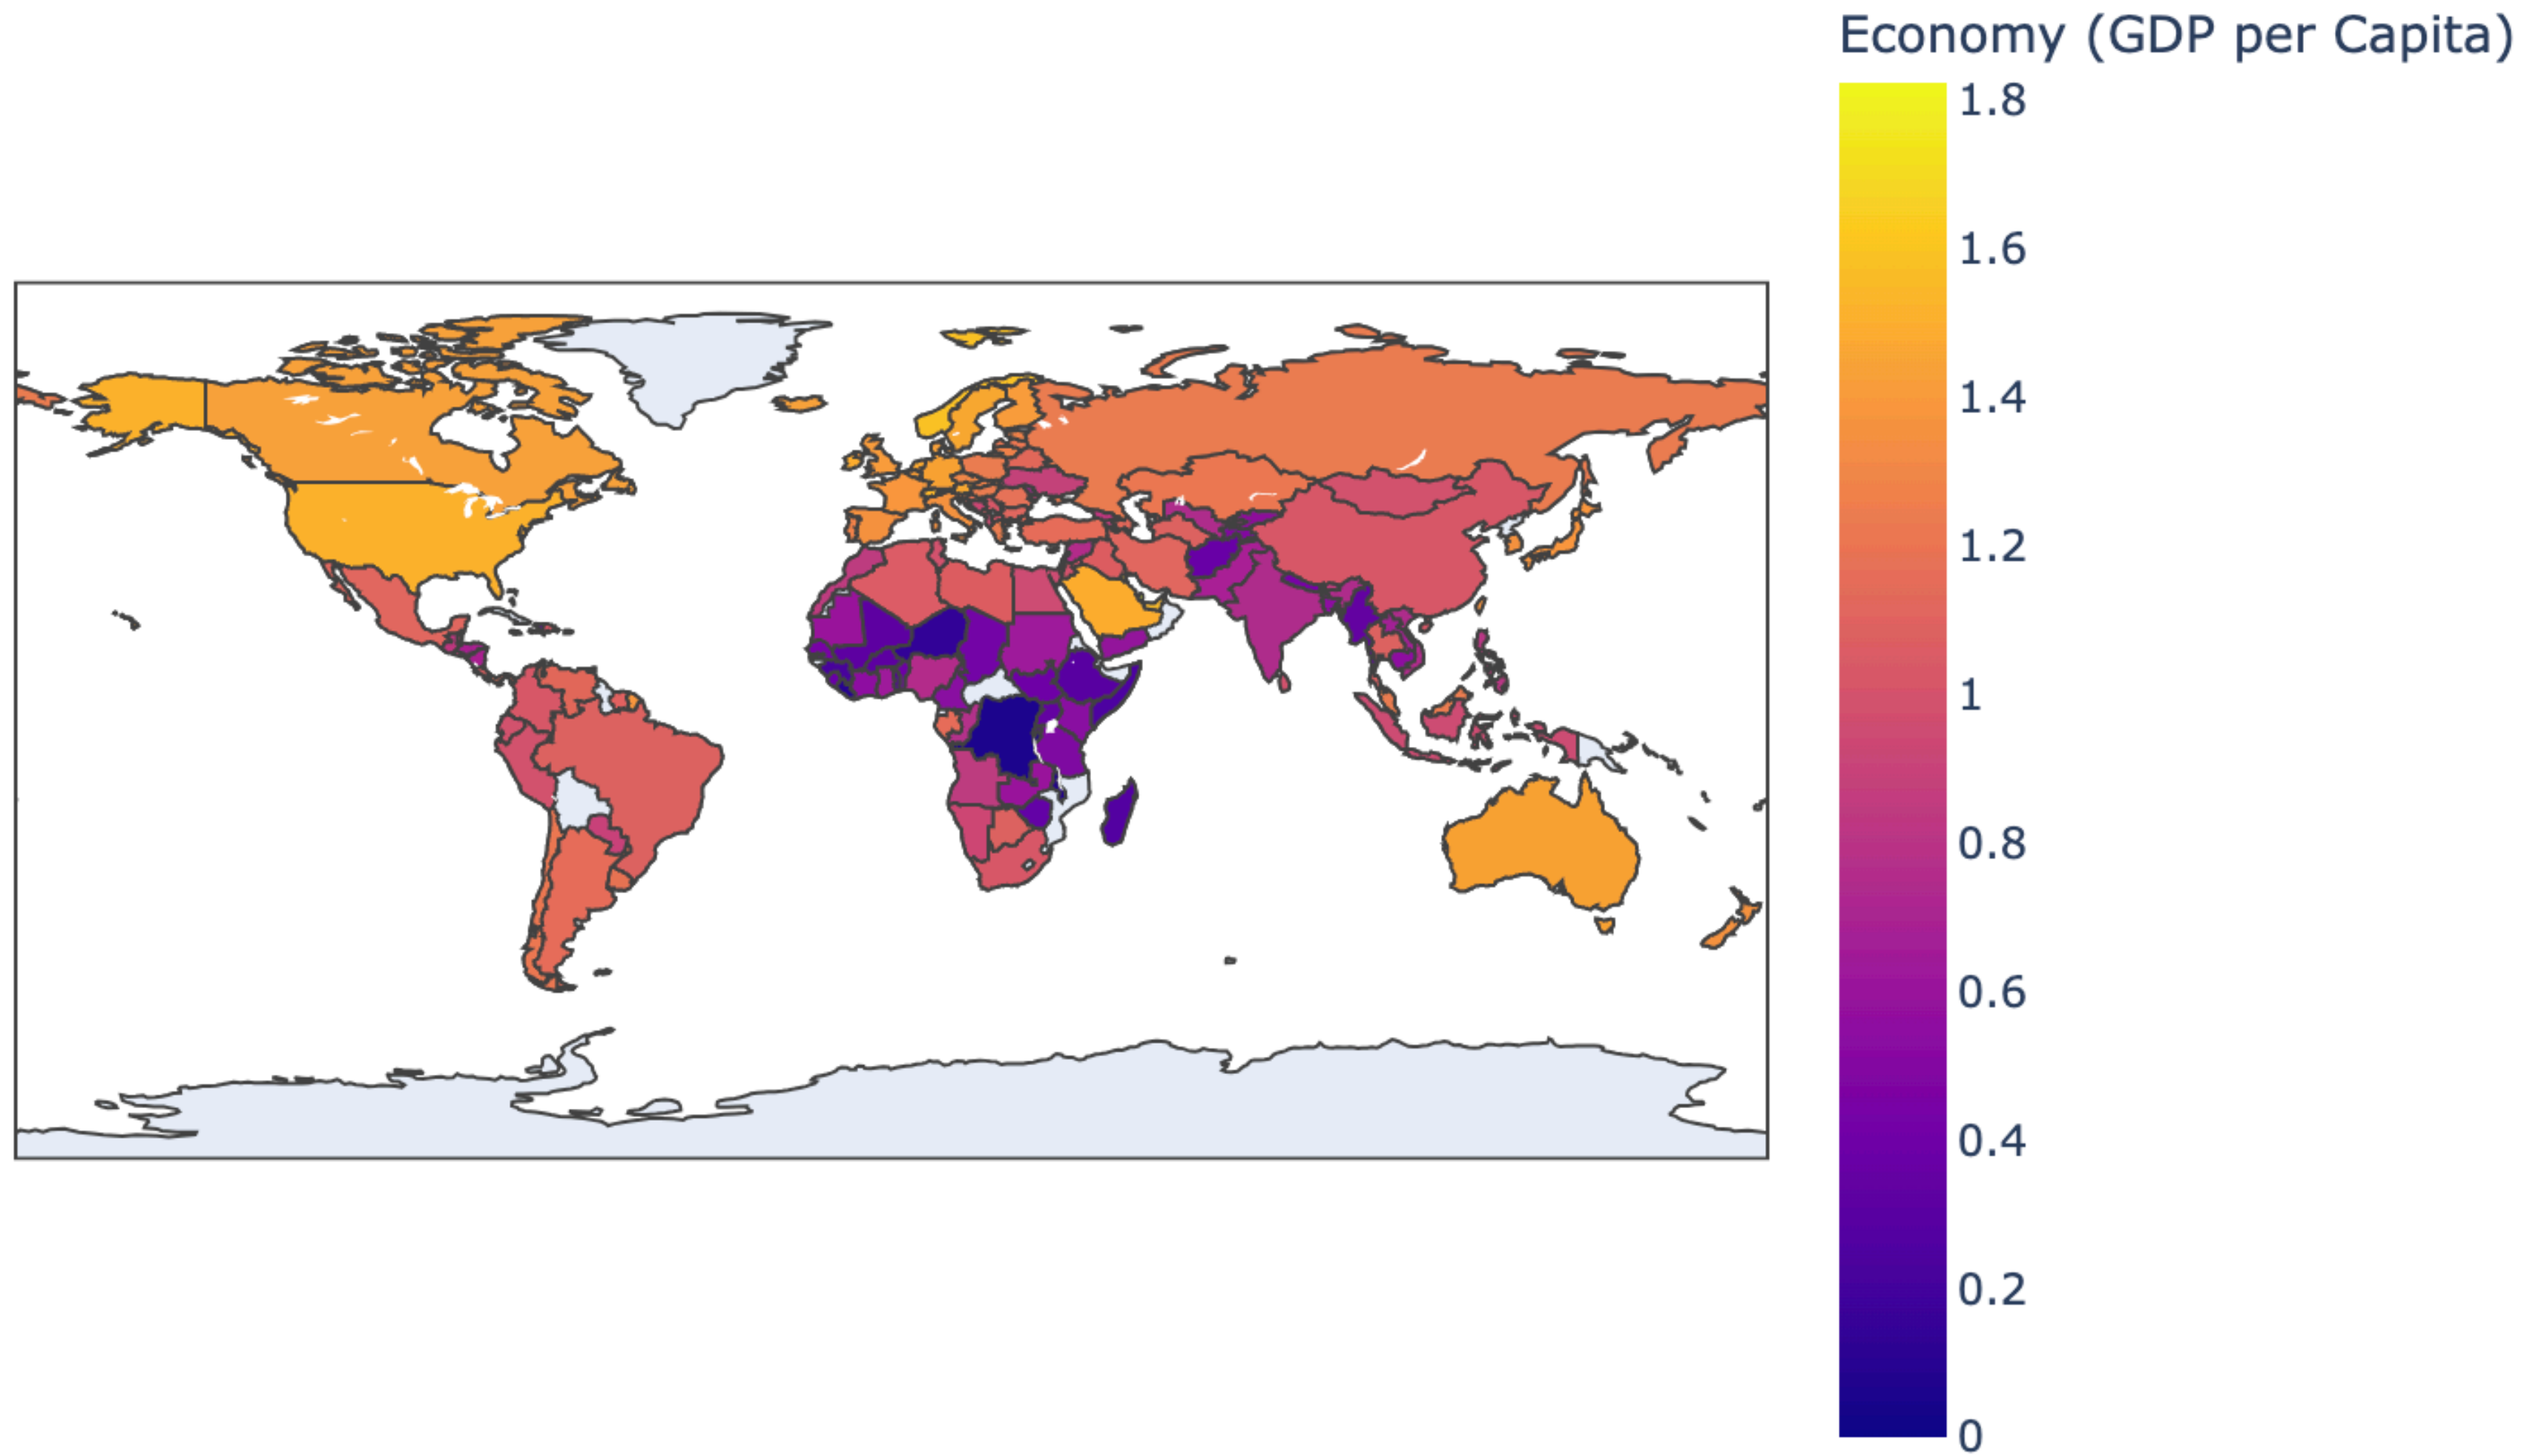

- Australia and New Zealand
- North America
- Western Europe
- Latin America and Caribbean
- Eastern Asia
- Middle East and Northern Africa
- Central and Eastern Europe
- Southeastern Asia
- Southern Asia
- Sub-Saharan Africa

Choropleth Map: GDP per Capita and Healthy Life Expectancy

- The choropleth map displays the GDP per Capita of countries, with Healthy Life Expectancy shown as a tooltip. This geographic visualization allows us to see economic and health disparities across the globe. By hovering over each country, we can view additional information on Healthy Life Expectancy, providing a more comprehensive understanding of how economic wealth correlates with health outcomes.

GDP per Capita and Healthy Life Expectancy by Country

Conclusion

- This dashboard offers a holistic view of the factors contributing to global happiness, enabling policymakers, researchers, and the general public to make informed decisions and foster a happier world. Explore the visualizations and uncover the fascinating insights they reveal about happiness across different regions and countries.
